Education

(Sentabr 2020 – now)
Tashkent Information Technologies University,
Telecomunication techlogies faculties

Skills

Profile

I completed the ZAKO IT Academy FRONTEND course in May 2022. Then I learned vue js technology as an practitioner at the main Genesis Innavation for 3 months. Then I worked as a strong junior frontend developer at RTECO for 5 month.

Experience

Frontend developer (stajor)   **May 2022 – Iyul 2022**

Genesis Innovation

Frontend developer(strong junior)   **Noyabr 2022 - Mart 2023**

RTECO(xususiy korxonasida)

- **Made an interface for various sites at the same time studied the basics of javascript.**
- **I learned how to design perfectly and flexibly and work with apis coming from the backend**
- **Here I learned vue 3 js and typescript technologies from powerful programmers**

I have experience in HTML5 3 years I am very interested in writing myself to make layouts.
According to javascript, I have experience for two years, I started use classic jQuery, then native Javascript, and now I am coding on a modern framework like Vue.
Sass is a very good instrument for me. I have 3 years of experience with sass. I use the BEM methodology for naming classes.

I have recently started using typescript on my projects and it has become an indispensable tool for me.

I have more than 3 year and a half experience in vue and now mainly work on this framework.
